BUSINESS ANALYSIS | CHANGE & TRANSFORMATION | AI & AUTOMATION

EDUCATION

The City College of New York | New York, NY

Sep 2026

Bachelor of Arts in Management and Administration, Magna Cum Laude | GPA: 3.5

Relevant Coursework: Statistics, Python for Business Analytics, Supply Chain Management

EXPERIENCE

FDM Group | New York, NY

Aug 2026 - Present

Change & Transformation Consultant

- Produced requirements, process maps, user stories, stakeholder analyses, RAID/governance artifacts, and Agile delivery documentation through case-based business analysis and transformation work.
- Applied business analysis, Scrum/SAFe, change management, Excel, Power BI, SQL, and applied AI to translate business needs into structured delivery artifacts.
- Selected to support Computershare's North America Copilot Hackathon; troubleshoot Copilot Studio workflows, connectors, configurations, and environments, supported Power Automate integrations, and escalated complex cases to technical specialists.

Amazon | Melville, NY / Hazleton, PA

Oct 2024 - Aug 2026

Warehouse Associate / IT Superuser

Oct 2024 - Aug 2026

- Served as first-line IT support for warehouse operations, troubleshooting thin clients, monitors, scanners, and other hardware; triaged incidents, resolved issues when possible, and created or escalated tickets for higher-level technical problems.
- Performed daily operational-readiness audits and on-call floor support, documenting device health and issues affecting associates and operational workflows.

Area Manager Intern

Jun 2025 - Aug 2025

- Independently analyzed alarms, operational data, and floor observations during an Area Manager internship to investigate recurring bottlenecks and develop an operational improvement proposal.
- Developed and presented a phased implementation plan and business case. A proposed pilot did not run during the internship because the equipment was allocated to another project; projected benefits were not validated.

DvzzPins | East Elmhurst, NY

Dec 2020 - Oct 2022

Founder

- Founded and operated a Shopify business, coordinating product specifications, supplier proofs, restocks, and customer operations. Available store exports record 199 orders and \$3,760 in net sales; these figures represent sales activity, not profit.

PROJECTS & LEADERSHIP

AI Business Analysis Agent | Training Case Study

- Designed a document-grounded AI agent with human-in-the-loop workflows to separate source-backed requirements from assumptions, surface gaps, and support user stories, MoSCoW prioritization, backlog refinement, and Given/When/Then acceptance criteria.

Tetsu Workout Engine | AI-Assisted Product / BA Project

- Defined functional and non-functional requirements for a workout-tracking application, translating onboarding and in-session pain points into prioritized workflows for routine ingestion, offline tracking, rest timing, analytics, and data portability.
- Used AI-assisted development to build and iterate on routine intake and workout logging, directing requirements and testing through personal use. Progress analytics remain under validation.

The Braven Accelerator | Team Lead | New York, NY | Aug 2023 - Dec 2023

- Served as primary project manager for a university app-redesign capstone, coordinating planning, tasks, stakeholder communication, meetings, and presentation rehearsals; research and prototype design were team contributions.

SKILLS

Business Analysis: Requirements Elicitation, Requirements Analysis, Process Mapping, User Stories, Acceptance Criteria, Stakeholder Analysis, Process Improvement, Root-Cause Analysis, Agile/Scrum, Change Management

Data & Technology: SQL, Excel, Power BI, Microsoft 365, Copilot Studio, Power Automate, Shopify

AI & Automation: Generative AI, LLMs, AI Agents/Assistants, Prompt Engineering, Human-in-the-Loop AI, AI-Assisted Workflows, Workflow Design

Language: Spanish (Fluent)
